Summary / Résumé

The MFI project aims to spread financial services to migrant women wishing to start or develop their companies, but who can't access or are excluded from financial systems. Through public funding, 34% of which has been allocated from the European Regional Development Fund, the Institute has been able to demonstrate the effectiveness of micro-credit in Sweden.

This project is one of the five winners of the RegioStars Awards 2010 awarding the most innovative projects in European regions.
